

# Teaching Statement

Suraj Srinivas  
Harvard University  
`ssrinivas@seas.harvard.edu`

I have accumulated substantial teaching and mentoring experience during my time at Cornell. For two semesters, I taught a weekly section on introduction to programming, providing me with ample opportunities to both lecture and engage students in discussion. I have advised fifteen group projects in artificial intelligence, and also co-advised multiple undergraduate research projects with Professor Thorsten Joachims. I was the lead teaching assistant for Cornell's inaugural undergraduate course on social and information networks taught by Professors Jon Kleinberg and David Easley, where my contributions included creating new course material as well as managing the course blog.<sup>1</sup> I also have experience teaching tutorials, including at major conferences such as SIGIR
